

SANJAEEL RAJA M

Full-Stack Developer | AI & Data Science | Fresher
+91-6369614976 | sanjeelraja@gmail.com | Coimbatore, TN | [linkedin](#) | [github](#)

PROFESSIONAL SUMMARY

Motivated and detail-oriented Full-Stack Developer with a B.Tech background in Artificial Intelligence and Data Science. Experienced in designing and developing responsive web applications and mobile solutions using React.js, PHP (Laravel), MySQL, and MongoDB. Completed two industry internships delivering real-world full-stack projects including an E-Commerce platform and multiple data-driven web applications. Strong problem-solving aptitude complemented by competitive programming achievements and a continuous learning mindset. Eager to contribute to dynamic engineering teams as a Software Developer, Full Stack Developer, or Web Developer.

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, JavaScript, PHP

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Responsive Web Design

Backend: PHP, Laravel Framework, REST API Development

Mobile Development: React Native (Cross-Platform)

Databases: MySQL, MongoDB, PostgreSQL

Tools & Platforms: Git, GitHub, VS Code, Postman, Thunder Client, Cursor, XAMPP

Concepts: MVC Architecture, OOP, RESTful APIs, Agile Development, SDLC, CRUD Operations

INTERNSHIP EXPERIENCE

Full Stack Developer Intern • Sivasethu Info Tech • May 2025 – June 2025 | Trichy, Tamilnadu

- Developed a fully functional E-Commerce Website using PHP and MySQL, implementing product catalog, shopping cart, order placement, and admin dashboard modules from scratch.
- Built dynamic front-end pages with HTML5, CSS3, and JavaScript, ensuring responsive layouts compatible across desktop and mobile browsers.
- Designed and managed MySQL database schemas for user accounts, product inventory, and order records, writing optimized SQL queries for filtering, searching, and reporting operations.
- Implemented secure user authentication with session-based login, registration, and password hashing, preventing unauthorized access to customer and admin portals.
- Debugged and resolved 15+ functional issues through systematic testing, collaborating closely with senior developers and participating in daily stand-ups to track sprint progress.

Full Stack Developer Intern • Appin Technology • Jun 2025 | Coimbatore, TN

- Contributed to the development of a multi-module web application covering both front-end UI design and back-end server-side logic using PHP, JavaScript, and MySQL.
- Integrated third-party REST APIs into the application, handling asynchronous data fetching and rendering dynamic content updates without full page reloads.
- Participated in all phases of the Software Development Lifecycle (SDLC) including requirements analysis, design, coding, testing, and deployment support.
- Performed manual and functional testing of application modules using Postman and Thunder Client for API validation, ensuring data integrity and error-free endpoint responses.
- Maintained version-controlled codebase using Git and GitHub, raising pull requests and resolving merge conflicts in a collaborative team environment.

Site Reliability Engineer Intern (DevOps) • Sparkcurv Technologies Pvt. Ltd. • May 2026 – June 2026 / Nagercoil, Tamilnadu

- Assisted in monitoring and maintaining production application uptime using observability tools, responding to alerts and escalating critical incidents to senior SRE engineers.
- Worked with CI/CD pipeline configurations to support automated build and deployment workflows, gaining hands-on exposure to DevOps tooling and release management processes.
- Documented runbooks and incident response procedures, contributing to team knowledge base and reducing mean time to resolution (MTTR) for recurring infrastructure issues.
- Collaborated with development and operations teams to identify performance bottlenecks, supporting root cause analysis and implementing minor configuration fixes in staging environments.

PROJECTS

Brain Tumor Detection | *Python, TensorFlow/Keras, CNN, OpenCV, Flask*

- Developed a deep learning-based brain tumor detection system using Convolutional Neural Networks (CNN) trained on MRI scan datasets, achieving high classification accuracy across tumor and non-tumor categories.
- Preprocessed and augmented MRI image data using OpenCV and Keras ImageDataGenerator, improving model generalization and robustness against varied scan quality and orientations.
- Built a Flask web interface allowing users to upload MRI images and receive instant AI-powered diagnostic predictions with confidence scores, making the model accessible without technical expertise.

MediScribe AI – Healthcare AI Assistant | *Python, NLP, Speech Recognition, React.js, PostgreSQL*

- Designed and developed MediScribe AI, a healthcare assistant that transcribes live doctor-patient conversations using speech recognition and automatically generates structured clinical notes, reducing documentation time by up to 70%.
- Implemented NLP-based patient history summarization pipeline to extract key symptoms, diagnoses, medications, and timelines from conversation transcripts, delivering concise summaries to physicians post-consultation.
- Built an intelligent health risk alert module that analyzes patient data and flags potential drug interactions, abnormal vitals, or high-risk symptom patterns, supporting proactive clinical decision-making.
- Stored and managed patient records, session transcripts, and alert logs in a PostgreSQL database with role-based access control, ensuring data privacy and HIPAA-aligned data handling practices.

Feedback Management System | *PHP, MySQL, HTML5, CSS3, JavaScript*

- Built a multi-user feedback platform with dynamic submission forms and an admin panel for categorizing, moderating, and responding to feedback entries stored in a normalized MySQL database.
- Developed an analytical reporting dashboard displaying submission trends, category distributions, and response rates, giving administrators actionable insights at a glance.
- Implemented server-side validation, duplicate prevention, and XSS sanitization to maintain clean data integrity and protect against common web vulnerabilities.

Fitness Goal Tracker | *React.js, PHP, MySQL, CSS3*

- Built a full-stack fitness tracking app where users set personalized goals, log daily activities, and visualize progress through interactive dashboards with weekly and monthly trend charts.
- Developed a React.js frontend with reusable component architecture and a PHP/MySQL backend handling multi-user session management, goal persistence, and activity history.
- Integrated performance analytics showing completion rates and goal achievement streaks, improving user engagement and motivating consistent activity logging.

E-Commerce Website | *PHP, MySQL, HTML, CSS, JavaScript*

- Developed a full-featured E-Commerce platform with product catalog, category filtering, shopping cart with quantity management, and a complete checkout and order tracking workflow.
- Built a secure admin panel for product CRUD, inventory management, and order processing; implemented session-based authentication with password hashing for both customer and admin roles.
- Designed a normalized relational MySQL database covering users, products, categories, carts, and orders with referential integrity constraints supporting complex reporting queries.

Blood Donation Application | *React.js, PHP, MySQL*

- Built a community blood donation platform where donors register with blood group and location, creating a real-time searchable directory for recipients and hospitals to find compatible donors rapidly.
- Implemented an emergency request module enabling hospitals to post urgent blood requirements, with automated matching against registered donors based on blood group and proximity.
- Designed a responsive, accessible UI for seamless donor onboarding and request management, maximizing platform adoption across diverse user demographics.

EDUCATION

B.Tech – Artificial Intelligence & Data Science – Sri Krishna College of Technology, Coimbatore | 2023 – Present | **CGPA: 7.04**

Higher Secondary Certificate (HSC) – Tamil Nadu State Board | 2022 – 2023 | **76.6%**

Secondary School Leaving Certificate (SSLC) – Tamil Nadu State Board | 2020 – 2021 | **100%**

CERTIFICATIONS

- Full Stack Development Internship Certificate – Sivasethu Info Tech (2025)

- Full Stack Development Internship Certificate – Appin Technology (2025)
- Learnathon Completion Certificate – [Issuing Organization, Year]

ACHIEVEMENTS

- Winner – Stack Storm, SRM University Technical Fest: Secured first place in a high-stakes full-stack development competition, demonstrating rapid problem-solving and application development skills under time pressure.
- Runner-Up – Query Quest, SRM University Technical Fest: Achieved second position in a competitive SQL and database design challenge, showcasing strong relational database and query optimization capabilities.
- Inter-College Representative – Selected to represent Sri Krishna College of Technology (SKCT) at SRM University technical events, competing against top engineering institutions across Tamil Nadu.
